

## Bullcrap: Privacy policy

Welcome to Bullcrap for iOS!

As a developer and iOS user, I take privacy very seriously. I know how annoying it is when apps collect your data without your knowledge.

I have developed this app to not collect any personally identifiable information.

Only when using entering in a profile or playing a multiplayer game is information stored on our server.

The profile information stored is simply the name you enter in, the character you select and the unique ID of the device you are using.

The multiplayer feature keeps track of the players you have previously played against.

This is used in the multiplayer lobby to suggest people to play against.

Other multiplayer information temporarily stored is related to the game you are playing. It is cleared when the game is completed.

All other data such app preferences are stored on your device only and can be simply erased by clearing the app's data or uninstalling it.

No data is shared with third parties.

If you find any security vulnerability that has been inadvertently caused by me or have any question regarding how the app protects your privacy, please send me an email and I will surely try to fix it/help you.

Yours sincerely,

David Sims
